

`http://www.servername.com/rango/about/`

Protocol and Domain Name

`http://www.servername.com/`

Project Configuration's `urls.py`

`rango/`

Rango's (you app's) `urls.py`

`about/`

```
graph TD; A["http://www.servername.com/rango/about/"] --> B["http://www.servername.com/"]; B --> C["Project Configuration's urls.py"]; C --> D["Rango's (you app's) urls.py"]; D --> E["about/"];
```

The diagram illustrates the process of resolving a full URL into its constituent parts. It starts with a full URL at the top, which is then broken down into the protocol and domain name, the project configuration's URL patterns, and finally the specific application's URL patterns.
